MOOSE CREEK RED ANGUS

Yearling Bull Sale

2022

Welcome to the Moose Creek Red Angus 28th Annual Yearling Bull Sale.

Thank you for taking the time to view our catalogue and evaluate the sale offering. We are proud to display them for your appraisal. It is truly one of the most gratifying experiences in the cattle business; to offer your crop to the general public to scrutinize and bid on. That is the event that makes all of the long days and hard work worth it.

As always, we have developed the bulls with soundness and longevity top-of-mind. Because of the dry growing season, we made our highest quality feed ever. Therefore, we have been able to grow the bulls with the least amount of grain in their ration yet. The bulls have eaten a modest 4 pounds of HM corn grain and 5 pounds of whole oats. Even with the last 7 weeks of brutal cold and high winds, the pen is tracking to be above the average daily gains calculated over the previous 10 years.

This works directly into one of our core cowherd principles; breed and raise a cow that requires less feed to produce equivalent pounds and quality. In short, lower daily feed costs per cow and achieve the same results. Many tools available incorporate science and technology claim to do this, but nothing replaces a disciplined, structure system. Let the system weed out the weak ones, it's the most accurate process we have found.

As I write this, the country and world seems to be in a state of unrest. The #FreedomConvoy and now the Russian invasion are putting an emphasis on food security and supply chain confidence. Regardless of your political affiliation, people need to eat and there continues to be no substitute for the protein and dense nutrition that beef supplies. We are on the cusp of something never seen before with prices. Don't miss out!

Our sale group of bulls is deep and has something for everyone that appreciates good cattle produced in a highly competitive environment. Please join us sale day to see what 7 decades of Red Angus breeding looks like.

“The weaning weights are actual’s. It’s simple to figure out if they have enough performance this way. No formula manipulating the data. Just the same way you sell your calves. We wean them, haul them home, sort and weigh. The actual weaning weight is a shrunk weight too. We are trying hard to supply accurate, relevant numbers.”

“There are no EPD’s on the sale bulls. It’s a decision that we’ve been wrestling with for the past few years. When the process of calculating EPD’s became a battle of contemporary groups, the numbers become nothing more than marketing fodder. No different than show results or photo-shopped pictures. Instead of looking at fictitious, uneducated guesses, tour the cow herd, visit about the feeding program, and ask about the operations breeding philosophy. You’ll learn a hell of a lot more from that, than from some indexes.” ~Darren

WELCOME TO MOOSE CREEK RED ANGUS

Welcome to Moose Creek Red Angus. Established in 1972, we are one of Canada's pioneer Red Angus breeders. Situated in the southeast corner of Saskatchewan, our cattle are raised on the native range south of the Moose Mountains.

Our program is committed to producing sound, fertile, easy keeping cattle designed for the commercial cowman.

Annually, we host an on-farm yearling bull sale mid-April, and sell replacement quality females from our large commercial herd each fall. In the past we have offered 2-Year Old Bulls for sale by private treaty at our Open House. Now in 2016, we will host two sales at the ranch: 2-Year Olds will sell by auction at the ranch in February, and our popular Yearling Bull sale in April.
